## IN THE CLAIMS:

The status of each claim that has been introduced in the above-referenced application is identified in the ensuing listing of the claims. This listing of the claims replaces all previously submitted claims listings.

- 1. (Previously presented) A bowling ball, comprising:
  a mass comprising a two-part resin; and
  a fragrance at least partially dissolved in at least a portion of said two-part resin of said mass.
- 2. (Original) The bowling ball of claim 1, wherein said mass is substantially nonporous.
  - 3. (Original) The bowling ball of claim 1, wherein said mass is substantially rigid.
  - 4. (Canceled)
- 5. (Previously presented) The bowling ball of claim 1, wherein said two-part resin comprises polyurethane.
  - 6. (Canceled)
- 7. (Previously presented) The bowling ball of claim 1, wherein said fragrance is dispersed throughout at least said portion of said two-part resin.
- 8. (Original) The bowling ball of claim 1, wherein said fragrance comprises up to about 2% of the weight of the bowling ball.
- 9. (Previously presented) The bowling ball of claim 1, further comprising a pigment, wherein a scent of said fragrance correlates with a color of a pigment of or in said two-part resin.

- 10. (Previously presented) A method for manufacturing a bowling ball, comprising: providing a liquid material; blending at least one fragrance directly into said liquid material; introducing said liquid material and said at least one fragrance into a cavity of a mold; and curing said material with said at least one fragrance therein.
- 11. (Previously presented) The method of claim 10, wherein said providing said liquid material comprises providing a polyol.
- 12. (Original) The method of claim 11, wherein said introducing includes introducing an isocyanate into said cavity with said liquid material and said at least one fragrance.
- 13. (Original) The method of claim 12, wherein said introducing includes mixing said polyol and said isocyanate.
- 14. (Previously presented) The method of claim 10, wherein said blending comprises dissolving said at least one fragrance in said liquid material.
- 15. (Previously presented) The method of claim 10, wherein said blending comprises dispersing said at least one fragrance throughout said liquid material.
- 16. (Previously presented) The method of claim 10, wherein said curing comprises permitting said liquid material to harden.
- 17. (Previously presented) The method of claim 10, wherein said curing comprises introducing a polymerization catalyst for said liquid material into said cavity with said liquid material and said at least one fragrance.

- 18. (Previously presented) The method of claim 17, wherein said providing said liquid material comprises providing a polyol.
- 19. (Original) The method of claim 18, wherein said introducing said polymerization catalyst comprises providing an isocyanate.
- 20. (Currently amended) A method for forming an article of manufacturemanufacturing a bowling ball, comprising: providing a polyol;

blending at least a fragrance directly into said polyol;

substantially removing gas or gas bubbles from a mixture including said polyol and said fragrance;

introducing said mixture and a polymerization catalyst therefor into a cavity of a mold; and permitting a blend including said polyol and said polymerization catalyst therefor to at least partially polymerize to form the article of manufacture a bowling ball.

- 21. (Original) The method of claim 20, wherein said blending at least said fragrance comprises dissolving at least one fragrance in said polyol.
- 22. (Original) The method of claim 20, wherein said blending at least said fragrance comprises dispersing at least one fragrance throughout said polyol.
- 23. (Previously presented) The method of claim 20, wherein said introducing includes blending said polyol and said polymerization catalyst therefor.
- 24. (Original) The method of claim 20, wherein said introducing said polymerization catalyst includes introducing isocyanate into said cavity with said polyol.

- 25. (Original) The method of claim 20, further comprising removing the article of manufacture from said cavity.
- 26. (Original) The method of claim 25, further comprising removing irregularities from the article of manufacture.
- 27. (Currently amended) An article of manufacture A bowling ball, comprising: a substantially rigid, substantially nonporous spherical mass comprising a two-part resin and configured as a bowling ball; and fragrance at least partially dissolved within at least a portion of said two-part resin.
  - 28. (Canceled)
- 29. (Currently amended) The <u>article bowling ball</u> of claim 27, wherein at least a portion of said fragrance is dispersed throughout said two-part resin of at least a portion of said mass.
  - 30. (Canceled)
- 31. (Currently amended) The <u>article-bowling ball</u> of claim 27, wherein said two-part resin comprises a two-part polyurethane.
- 32. (Currently amended) The article bowling ball of claim 27, further comprising a pigment.
- 33. (Currently amended) The <u>article bowling ball</u> of claim 32, wherein a scent of said fragrance correlates with a color of said pigment.
